## **WAVE 1 (APRIL 2023) TOPLINE REPORT: CHIPS Act**

Selected items for release September 15, 2023

Principal investigators: Nyron Crawford (Temple University), Alexandra Guisinger (Temple University), and Katja Kleinberg (Binghamton University, SUNY)

**Methodology:** This analysis is based on data from the Foreign Policy in a Diverse Society Wave 1 (April 2023) Survey. Wave 1 was conducted April 14-16 by the National Opinion Research Center (NORC) as part of its bi-monthly AmeriSpeaks Omnibus. AmeriSpeak Omnibus uses a nationally representative sample of 1089 adult Americans age 18+, drawn from the AmeriSpeak Panel. AmeriSpeak households are selected randomly from NORC's National Sample Frame. The National Frame is representative of over 97 percent of U.S. households and includes additional coverage of hard-to-survey population segments, such as rural and low-income households, that are underrepresented in other sample frames. Respondents may participate in English or Spanish and over the internet or by telephone, depending on respondent preference. The overall margin of sampling error is +/-4.07 percentage points at the 95 percent confidence level. The margin of sampling error may be higher for subgroups.

Partisan identification is based on how respondents answered a standard partisan self-identification question: "Do you consider yourself a Democrat, a Republican, an independent or none of these?" Participants could select on a 7 point scale: Strong Democrat; Not so strong Democrat; Lean Democrat; Don't Lean/independent/None; Lean Republican; Not so strong Republican; Strong Republican. Gender is based on respondents answer to "What sex were you assigned at birth, on your original birth certificate?"

**The Foreign Policy in a Diverse Society project** (DOI 10.17605/OSF.IO/QJR49) seeks to better understand the breadth of American public opinion on foreign policy. Directed by Nyron Crawford (Temple University), Alexandra Guisinger (Temple University), and Katja Kleinberg (Binghamton University, SUNY), FPDS will field a series of public opinion surveys and survey experiments targeting underrepresented populations as well as a representative cross-section of the U.S. population. Support for this project was provided in part by a grant from Carnegie Corporation of New York.

TEMP6.

The U.S. Congress recently passed the CHIPS and Science Act [or CHIPS Act], which provides \$280 billion in grants and tax credits over the next ten years for domestic semiconductor manufacturing, research, and development.

How much have you heard about the CHIPS Act?

RESPONSE OPTIONS (Randomly reversed):

1. A great deal
2. Some
3. Not very much
4. Not at all

TEMP7.

Based on what you know, how much will the following groups benefit from the CHIPS Act?

GRID ITEMS, RANDOMIZED:

- A. Large companies
- B. Small companies
- C. Middle class
- D. Working class

RESPONSE OPTIONS (Randomly reversed):

1. A great deal
2. Some
3. Not very much
4. Not at all
